Develine provides this color chart for preliminary color selection only. Please refer to physical samples and/or on-site mock ups for final color selection

The intensity of the colors may differ depending on the dosage of colorant added to the mix.

Colorfast LIQ colors are compatible with any concrete microcement . Different microcements can give different shades of the same Colorfast LIQ color due to differences in their formulations. Color variances can also occur due to differences in the cement hydration process.

Colorfast LIQ colors are suitable for interior and exterior use.
